

Recommended EID Tag Placement for Cattle

Application site must be free of foreign debris prior to placement of tags on the animal. Review application instruction prior to tagging.

1. The EID tag should be placed in the middle of the ear between the two cartilage ribs close to the head.
2. The female portion of the tag should be on the inside of the ear with EID tag application. Note that this is a thicker part of the ear. Application may be more difficult than when applying a visual tag.
3. **IMPORTANT:** Caution, "Free Air Space" is critical for proper healing and retention. Inspect placement after tagging to insure there is sufficient space between ear and EID tag.
